

RStudio File Edit Code View Plots Session Build Debug Profile Tools Window Help 10 28 29% Tue 6:17 AM

Go to file/function Addins Project: (None)

Untitled1 x Untitled2* x

Knit Run

Insert

- R
- Bash
- Python
- Rcpp
- SQL
- Stan

Insert a new R chunk

```
---
title: "Untitled"
author: "Abhijit Dasgupta"
date: "11/28/2017"
output: html_document
---

```{r setup, include=FALSE}
knitr::opts_chunk$set(echo = TRUE)
```

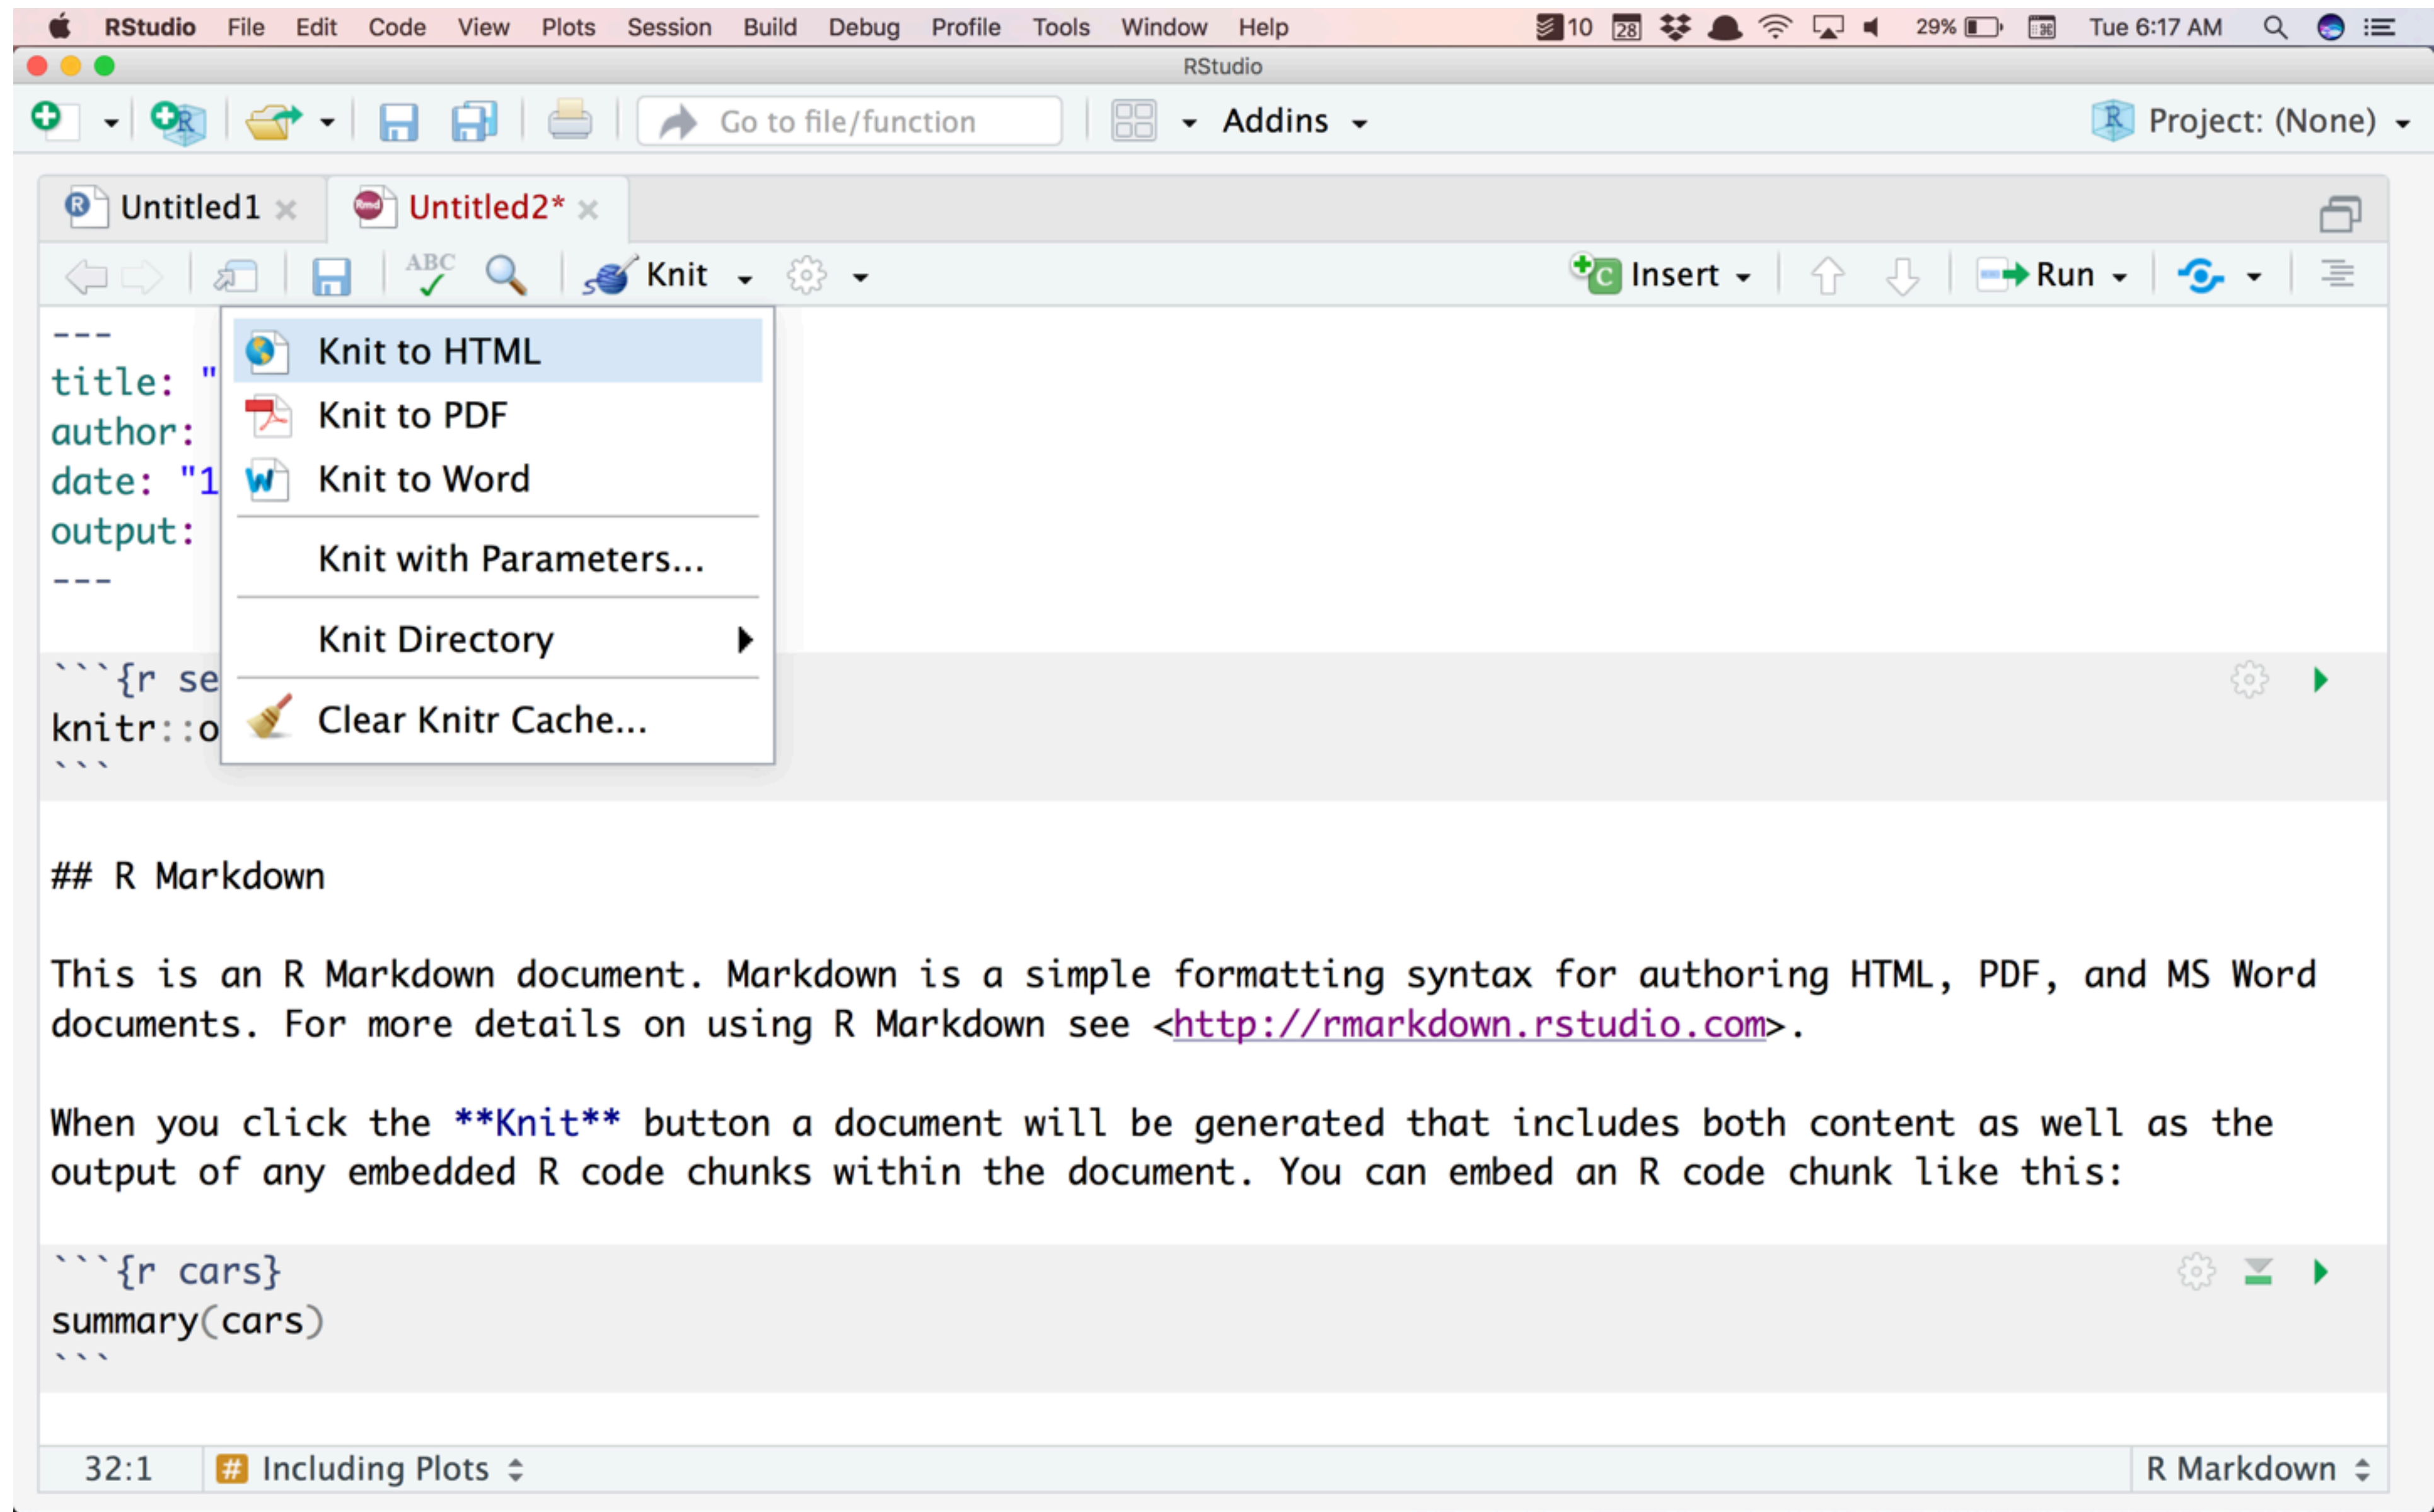

## R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the Knit button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```{r cars}
summary(cars)
```
```
