# Bias and variance in Machine Learning
```

```
## Bias and variance
```

- **\_\_Bias\_\_**: The error due to bias is taken as the difference between the expected (or average) prediction of our model and the correct value which we are trying to predict.

- **\_\_Variance\_\_**: The error due to variance is taken as the variability of a model prediction for a given data point.

```
## Bias and variance
```

```

```

# UNDERSTANDING THE BIAS-VARIANCE TRADEOFF
